Energy-saving sugar beet pulp drying sweetens the production cost balance
Low temperature belt dryer with Conducto® belts in the sugar industry

During the so-called sugar beet campaign the Austrian sugar producer AGRANA processes 25 truckloads per hour.

Low temperature belt dryer produced by the company Swiss Combi.

After the sugar has been extracted, the leftover beet pulp is dried and sold as animal feed.

Low temperature belt dryers with woven mesh process belts manufactured by GKD reduce the energy consumption of the beet pulp drying process.
